Chicago, Illinois 60606

Dear Mr. Patel:

Per our telephone conversation on March 8, 1988, I have enclosed the Minnesota Department of Health's (MDH) well records and water quality information for the Moorhead and Dilworth municipal wells. Routine chemical analyses performed on the Moorhead water supply are collected on the distribution system so no chemical data on individual wells is available.

Pesticide and volatile organic chemical analyses on selected wells revealed no detectable levels of these compounds. Well logs were not available for most wells, but summary information on each well is provided. Please call me at (612) 623-5557, if I can be of any further assistance.

Sincerely yours,

Edward C. Schneider, Hydrologist
Ground Water Quality Control Unit
